Key Projects

Drove a Hero SKU to BSR #1 with a combined on- & off-Amazon strategy

- Worked with the team on a two-phase play to drive volume (off-Amazon influencers + deal platforms, then on-Amazon promos that also captured long-tail off-Amazon traffic), while personally handling all influencer and deal-platform communication.

Amazon Black Friday — off-Amazon channel strategy

- Negotiated with deal-site category managers to win roundup features beyond standard placements.
- Pre-booked Black Friday slots with proven influencers for dedicated video features.
- Bought deal placements on niche PR media.

TikTok — seasonal inventory clearance

- Executed a TikTok-to-Amazon traffic-spillover strategy, achieving full sell-through across both channels ahead of the season-end deadline.
- Developed three script variations, pilot-tested with a few influencers, then standardized on the winner and scaled it campaign-wide.

Amazon affiliate data integration

- Built a modular multi-channel data pipeline with AI and Python, syncing to a live dashboard.

Other Achievements

- Built a multi-channel social-listening system and shared AI + web-scraping practices company-wide.
- Wrote Tampermonkey scripts to scrape Google paid placements, export YouTube comments and Reddit search URLs to JSON in one click.
